(323) 926-8499 | waynewei.tw@gmail.com | <https://github.com/wayneclub> | <https://www.linkedin.com/in/mrwwei/>

Professional Summary

Backend Software Engineer with over 6 years of experience building and operating scalable backend systems, including production AI service integrations. Strong background in backend system design, APIs, and cloud infrastructure. Led cross-functional teams to deliver backend solutions with measurable impact, including up to 30% cost reductions and 40% performance improvements.

WORK EXPERIENCE

Software Engineer (Backend-focused)

April 2020-July 2024

Freelance, Taipei, Taiwan

- Developed and maintained an open-source Python-based backend tool for subtitle processing with dual-subtitle support, earning 400+ GitHub stars, 3,000+ views, and 100+ clones
- Led integration of third-party services (payment gateways, APIs, CRMs) into enterprise systems using PostgreSQL, Python, Node.js, and Docker, reducing maintenance costs by 30%
- Improved backend performance and API response efficiency, resulting in a 15% reduction in end-to-end response time
- Directed implementation of AWS-based solutions (EC2, ELB, CloudFront, S3) for 24/7 site reliability, reducing downtime by 30% and increasing organic traffic by 20%
- Designed and integrated LLM-powered chatbot services, improving response accuracy by 25% and user engagement by 20%, with consideration for inference latency, scalability, and production reliability

Business Lecturer & IT Consultant, IT Department

June 2021-August 2021

Taipei Beitou Health Management Hospital, Taipei, Taiwan

- Trained 20 medical staff to develop an iOS e-bulletin board app using Swift, MySQL, and Firebase, reducing IT support requests by 20% and improving workflow efficiency by 15%
- Designed APIs to compress and process medical images, cutting database load by 30%, accelerating image loading by 40%, and reducing troubleshooting time by 25%

Software Engineer, IT Department

January 2018-March 2020

E.SUN Bank, Taipei, Taiwan

- Collaborated with IBM to maintain an online banking system for 2M+ users, optimizing performance with Spring Boot microservices and enhancing security with 2FA and biometric authentication
- Integrated PayPal API into internal systems and developed a Node.js tool for XML/JSON conversion, reducing API validation time from 3 months to 1 month
- Built a modular CMS for Web ATM using Java, Angular 6, Spring Boot, MS SQL, and Jenkins CI/CD, cutting new system development time by 40%
- Led a team of 6 to develop a shared foreign exchange platform, creating a reusable library that accelerated launch by 6 months and reduced troubleshooting time by 30%
- Automated quarterly financial report generation, reducing processing time from 4 hours to 0.5 seconds and accelerating forex platform deployment by 15%

SKILLS

- Programming Languages: Python, Java
- Backend & AI Systems: RESTful APIs, Spring Boot, Node.js (server-side), LLM / AI service integration (ChatGPT, Gemini), Latency-aware backend service design with scalability and reliability considerations
- Data & Infrastructure: Relational databases (PostgreSQL, MySQL), Semi-structured data storage (MongoDB), AWS (EC2, S3, CloudFront), GCP (Cloud Run, containerized backend services, logging & monitoring), Docker, CI/CD (Jenkins), Git
- CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, Design Patterns

CERTIFICATES

- Java SE 6 (Oracle), 2017

EDUCATION

University of Southern California

August 2024-May 2026

Master of Science in Computer Science

- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing

National Cheng Kung University (Taiwan)

September 2012-June 2016

Bachelor of Science in Computer Science and Information Engineering
